

**We are experts in “Temperature”
and can propose solutions to any
problem related to it.**

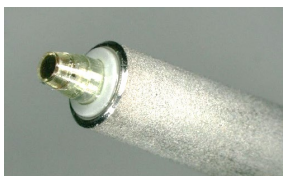

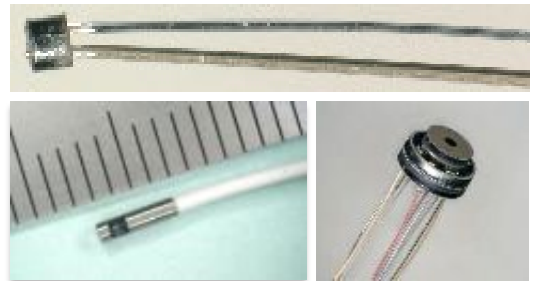

Temperature Sensors

*FT Thermistor (thin film type)
AP Thermistor (ultra-high accuracy type)
JT Thermistor (high accuracy, film type)
ET Thermistor (high sensitivity type)*

Micro Pressure Sensors

Combination micro assembled silicone by MEMS technologies and micro piezo resistance makes this absolute pressure sensor. Expected to be used mainly for several medical catheters.

Temperature sensor / protected heat source method

It can be used in equipment for non-invasive definitive diagnosis and stage diagnosis of skin cancer.

Realize your vision with SEMITEC

“Be at the forefront of innovation”

“Always look to the future”

“Always stay open-minded and innovation”
